Project Update #1

HWY 38 (Looking North at South Street)-  
Location of Stage 1 Construction

The first part of stage one will be Shoulder Widening (location in RED). We will pave asphalt shoulders to widen HWY 38, so truck traffic and residents have enough room to navigate around construction. Crews will start setting up for this on Monday, April 24<sup>th</sup>.

South Street (Looking Southwest at HWY 38)-  
Location of Stage 1 Construction

Again, see our Shoulder Widening areas (in RED). Watch out for trucks and equipment moving in and out of these zones. Our goal is to keep everyone safe and informed as we work through this project together.

**Note:** Again, starting Monday, be on the lookout for “lane drops” on the East and West side of Highway 38 (areas in RED) while we complete the work listed above. The beginning of this project, like many others, will involve jumping around a little bit before we get to our first major detour route. We will post updates as necessary for significant changes in traffic control and detours.

Thank you for your patience and cooperation as we continue to **Rebuild Tipton**
