Property Proposal

513 W. 9th Street

Purchase Price: \$3,000

After purchase is accepted our plan is to tear down the existing buildings on site and build a new single family house on the property. We would like to start the construction process right after the demolition of the existing building is complete to be as efficient as possible. The goal would be to have the project completed within a year of the demolition of the property. Our main area of business is construction of new houses and remodeling, so we plan on doing a majority of the work on the property. We will have to sub out plumbing, electrical, HVAC, and concrete. All work to be done on the property will be done by professional insured companies from the local area. Attached to the back of this form will be a rough cost estimate sheet and a proposed floorplan of the house we would like to build on the property. Any loan/credits needed to complete the project will be obtained through fidelity bank which we currently work through on our housing projects.

Proposed Purchase Price: **\$1.00**

Intended use of property after demolition: **New Residential Construction**

Estimated Cost of Project: \$160,000- \$185,000 for a single family 1 story, approximately \$200 per square foot for new construction.

*We are providing sample prints of single-family homes we have built in the past as reference, a single-family on slab, a single-family with basement, or a 2-story single-family with basement. We must take into consideration comparative market analysis to determine what size of a home can sell for the costs involved in this neighborhood.

Timeframe: Demolition would be completed within 60 days of closing; we estimate new construction would be completed within 18-36 months. This depends on the number of lots we purchase from the city.

Experience: We are a license construction contractor that provides framing services in Iowa. We build everything from residential, multi-family to commercial buildings. We can do 90% of all the work ourselves. We recently renovated 59 Walnut in Tipton. The home was foreclosed on and sold at auction by the bank, we had the winning bid at \$20,500. The house was in a state of needing to be demolished but we gutted the home to the frame, refurbished it and sold it for \$145,000 within a year of the purchase date. Included are before/after photos. You can see our work at: www.ericmeadeconstruction.com or on Facebook.

A bank letter supporting our credit to purchase the lots is attached.

Sample plans of new construction ideas attached.
