Project Update #25

Cedar Street Road Closure and Construction Activities

With the full closure on Cedar Street in affect, I hope everyone has been getting adjusted to utilizing the detour on Lemon Street. The contractor has been working hard keeping the job moving and has started installing sanitary sewer between 6th and 7th Street. Once they complete the underground utilities in that area, they will hop back to the South end of Stage Two, so that they can complete water service hookups as well as sanitary sewer services. The contractor is also making good progress removing the remaining pavement in place that was left behind from the mill.

Alley Construction and Access

Also, we would like to thank everyone for their patience while the new asphalt in the alley was being constructed. This is a big improvement that will help alleviate some of the hassles of losing street parking on Cedar Street for a while. As a reminder, traffic is to be maintained in a one-way direction (Northbound) through the alley West of Cedar.

NOTE: We will be closing the Intersection down at 3rd Street as needed throughout Stage 2. There will be notice to local businesses prior to any shutdowns. Some construction operations require a little more room into that intersection to complete, but we will try to make the closures as short as possible.

Thank you for your patience and cooperation as we continue to **Rebuild Tipton**
